

Cantilever weighted Guardrail System

The Cantilever weighted guardrail system is safe, reliable and versatile. As it is completely free-standing there's no need for drilling or penetration of the roof membrane. For added safety, all areas that come in contact with the roof have a fitted, protective anti-slip rubber pad.

Features and Benefits.

- Approved to EN 14122 Part 3 and EN 13374 Class A
- Upright Assembly
- Modular versatile construction
- Fittings and tube galvanised to BS EN ISO 1461
- Three optional types of upright available – Standard, Radiused & Raked
- Weights available in grey or orange as standard, other colours available
- Sections can be added to and changed on site
- Recycled PVC weights, with optional plastic covers are available for the counterbalance arm

We also offer a range of fixed guardrails.
