

Temporary Site Stairway

The Site Stairway is one of the most popular temporary access solutions we offer at Peoples Safety Ltd.

Due to increasingly stringent regulations and the change in construction industries thinking towards working at heights, this temporary site stairway offers a simple, safe and easy way to access different levels on the construction site for materials, workers and equipment.

Applications include providing access:

- Between levels of scaffold
- Up batters and embankments
- To table platforms
- To service ducts
- In lieu of permanent stairs
- To temporary site offices and Portacabins

Features and Benefits

- Designed and tested meet the access performance requirements within the European standard EN 12811.
- Quick and easy to install on site. Ready to use within minutes of being unloaded.
- Treads have a coarse, expanded metal plate for grip
- Adjustable double handrail on both sides
- Allows access for two users at any one time
- Stairway comes in 6 different lengths which can be joined and supported to provide a single climb height of up to 7.5m
