

Traditional Hooped Ladders

Galvanized Safety Ladders

Traditional Safety Ladders are bespoke designed and fabricated to meet your requirements.

Features and Benefits.

- All external ladders are Hot-Dip Galvanized for longevity and corrosion protection
- The heavy duty and hard wearing solution

Aluminium Safety Ladders

As per Galvanized Safety Ladders however Aluminium offers further benefits and choice.

Lightweight material offers easier installation where lifting equipment cannot be incorporated or where there are structural load considerations.

Features and Benefits.

- Anodized finish offers superior longevity and corrosion protection
- Strong aesthetics

Landing platforms and protection hoops may be required to comply with regulations:

Please contact Peoples Safety Ltd with your requirements.
